

## PROGRESSIVE LINK HYDRAULIC THUMBS

### FEATURES:

- ▷ Progressive link design allows clamp to match the maximum rotation of the bucket.
- ▷ Capability of full clamp rotation aids in material handling and placing.
- ▷ T100 tines for superior strength and wearability.
- ▷ Standard reinforced upper tine section eliminates stress from twisting.
- ▷ Multi-pass 100% welding at all stress points.
- ▷ All pins are heat treated alloy material with added induction hardening to main and idler pins.
- ▷ Heavy-duty links for increased power transfer – heavy linkage eliminates any possible bending.
- ▷ All bushings are through hardened and greaseable.
- ▷ 5000 psi rated cylinder with induction-hardened rod, piston and rod end cushions.
- ▷ Standard hose guard with added port fitting guards.

### OPTIONS:

- ▷ Replaceable teeth
- ▷ Tip saver (hardened tine tips)
- ▷ Forestry style
- ▷ Pin grabber compatible

### WEAR PACKAGES:

- ▷ **XTRA DUTY:** Good wearability in moderate conditions
- ▷ **XTREME DUTY:** Extreme rock type conditions

◁ **Complete selection of various sizes and configurations or can be custom built to your specifications** ▷
